#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5,16-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Hornsby et al. 2002/0127946.

Hornsby et al. disclose an air-pressurized water gun (col. 1, paragraph [0009], which comprises a housing (12) having a water tank (38), an air pump (33) mounted on the housing, a battery connected to the housing and in electrical connection with the pump (col. 3, paragraph [0041], actuation means for providing power from the battery to the pump such that compressed air is transferred from the pump into the tank (col. 3, paragraph [0041], an avenue of release between the tank and a nozzle (42) as seen in Figure 3a, with a selectively actuatable valve (44) located along the avenue of release to allow the discharge of pressurized fluid from within the tank, a manually operable trigger (24) attached to the housing that acuates the selectively actuatable valve, a linkage that connects the trigger to the selectively actuatable valve (col. 2, paragraph [0032], the actuation means is a switch (70) operated by a trigger (24).

## Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 6-10,13-15,18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hornsby et al. 2002/0127946 in view of Azuma et al. 5,356,051.

Hornsby et al. have taught all the features of the claimed invention except that a pressure sensor that measures pressure within the tank. Azuma et al. teach the use of a pressure sensor (7) being measured pressure within a tank (1), an air pump (21), wherein when the pressure within the tank reaches a predetermined level, the air pump is deactivated (col. 4, II. 39-66) and a pressure meter (24), wherein the pressure meter indicates pressure within the tank using multi-colored light emitting diodes (col. 8, II. 58-68 onto col. 9, II. 1-68 onto col. 10, II. 1-61).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the pressure sensor including the pressure meter of Azuma et al. onto the tank of Hornsby et al. as taught by Azuma et al. in (col. 2, II. 3-7), in order to provide a means of controlling the pressurizing device in response to a sensing signal from a pressure sensor.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hornsby et al. 2002/0127946 in view of Johnson et al. 5,586,688.

Hornsby et al. have taught all the features of the claimed invention except that a manually operated master switch. Johnson et al. teach the use of a manually operated master switch (31) (col. 3, II. 14-34).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the master switch of Johnson et al. onto the device of Hornsby et al., in order to provide the user a means of manually deactivating or activating the motor.

6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hornsby et al. 2002/0127946 in view of Hornsby et al 2002/0020712.

Hornsby et al. have taught all the features of the claimed invention except that a battery holder. Horsnby et al. [712] teach the use of a battery holder (250) for containing batteries, where the battery holder being located below and being wider than a handle (253) as seen in Figure 22.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the battery holder of Hornsby et al. [712] onto the device of Hornsby et al., in order to provide a holder for batteries.

#### Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Duffy et al. 6,672,200 and Ash et al. 6,082,589 disclose other types of pressurized container.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick C. Nicolas whose telephone number is (571)-

272-4931. The examiner can normally be reached on Monday - Friday from 9:00 AM to

5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver, can be reached on 571-272-4720. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
